Dear Sirs/Madam:

REACH: The new European Policy on chemical substances

The entrance in effect in June of 2007 of the new Regulation (EC) nº 1907/2006 regarding the registry, evaluation, authorization and restriction of substances and chemical preparations (REACH), takes a radical change in its management.

This new Regulation, which approximately replaces forty norms, has as main target to assure a high level protection of the human health and the environment, at the same time it is encouraging the innovation and promoting the uses of alternative methods to evaluate the dangerous properties of the chemical substances.

One of the major incentives of Regulation REACH is that it will produce or increase the existing information on the dangerous effects of the substances. It is based on the principle that it corresponds to the manufacturers, importers and intermediate users to guarantee that they only produce, commercialize or use substances do not affect negatively to the human health or the environment.

Therefore we inform you that:

KOPIMASK, does not have to register any of their products, according to Regulation REACH, since they are substances with no chemical reaction.

KOPIMASK will make sure that all the raw materials purchased are registered by their suppliers.

The current Material Security Data Sheets with ADR 2007 of mandatory fulfilment from July 1st 2007, **are effective until 2010**.

KOPIMASK will replace their present Material Security Data Sheets by those of the new regulation (REACH) during year 2009.

We are at your disposal for any further question or information you would like to consult us.

Best Regards,

KOPIMASK, S.A
